(54) Title: ARRANGEMENTS AND METHOD FOR HIERARCHICAL RESOURCE MANAGEMENT IN A LAYERED NETWORK ARCHITECTURE

WO 2004/051944 A1

(57) Abstract: The present invention relates to a data network, method and a computer program product, wherein the data network is implemented by a first network level (104) having a first addressing scheme and at least a second network level (108) having a second addressing scheme. Each network level provides connectivity over at least one network domain. The data network is characterised in that a first group of Network Resource Managers, NRMs, (b-d) is arranged to control the resources of the first network level and a second group of NRMs (e-g) is arranged to control the resources of the second network level. The NRMs of the first group (b-d) and second group (e-g) comprise means for exchanging resource requests by using the first addressing scheme and the NRMs (e-g) of the second group further comprise means for performing an address mapping between the first and second addressing schemes.
